

LSA-85

Linear Straight Actuator
Multiple Locating Device Capable

*Industry Standard
Off Set Loads / NC blocks
World Clamp Sensor*

Rigid and Precise

The LSA-85 uses a ceramic Circle-D bearing system that provides absolute rigidity with a long circle or round bearing to combat deflection, and a “D” bearing block to counter rotation. The “D” shape has no square corners to bind. This technology combined with CNC precision results in RapStop™, a system integral to every unit. RapStop™ replaces external stops and RAP couplings while it maintains Z-Axis accuracy to ± 0.050 mm. Tested with over 3,000,000 cycles and a 75mm offset 24kg load, the LSA-85 demonstrated less deflection than any commercially available locating pin and complies with every auto maker’s requirements.

Easy to Apply

The LSA-85 is symmetrical and has an extremely low profile to fit anywhere and stay out of the way of weld guns and other tooling. World standard sensors are employed to simplify controls integration. A bronze anti-weld slag wiper in a non-conductive mount requires no insulation option. The LSA-85 uses 100% NAAMS standard mounting patterns to assure easy design and assembly on the line. No orifices or other restrictions should be used in the application of Zaytran LSAs.

Weld Immune

The LSA-85 uses the double bronze wiper that has protected tens of thousands of LSA units in automotive factories all over the globe. This system aggressively removes any weld slag from the heat treated shaft.

Maintenance Free

The LSA-85 is guaranteed for the life of the tool (with design sign-off). There are no seals or plastic scrapers to change, no covers with pinch points, and no requirement to lubricate the unit.
